what are the key ideas that underpin learning from experience how do we learn from experience how does context and purpose influence learning how does experience impact on individual and group learning how can we help others to learn from their experience using experience for learning reflects current interest in the importance of experience in informal and formal learning whether it be applied for course credit new forms of learning in the workplace or acknowledging autonomous learning outside educational institutions it also emphasizes the role of personal experience in learning ideas are not separate from experience relationships and personal interests impact on learning and emotions have a vital part to play in intellectual learning all the contributors write themselves into their chapters giving an autobiographical account of how their experiences have influenced their learning and what has led them to their current views and practice using experience for learning brings together a wide range of perspectives and conceptual frameworks with contributors from four continents and should be a valuable addition to the field of experiential learning

in this book we take the reader on a journey through the various curriculum reforms that have emerged in the usa around the idea of conducting education outdoors through initiatives such as nature study camping education adventure education environmental education experiential education and place based education this is a historical journey with an underlying message for educators one we are able to illuminate through the educational theories of john dewey central to this message is a deeper understanding of human experience as both aesthetic and reflective leading to a more coherent comprehension of not

just outdoor education but of education itself

this carefully crafted ebook experience and education premium edition including democracy education is formatted for your ereader with a functional and detailed table of contents experience and education stresses the importance of the social and interactive processes of learning it also emphasizes experience experiment purposeful learning and freedom as essential components of progressive education democracy and education synthesizes criticizes and expands upon the democratic or proto democratic educational philosophies of jean jacques rousseau and plato john dewey 1859 1952 is one of the primary figures associated with the philosophy of pragmatism and is considered one of the founders of functional psychology his ideas have been influential in education and social reform known for his advocacy of democracy dewey considered two fundamental elements schools and civil society to be major topics needing attention and reconstruction to encourage experimental intelligence and plurality excerpt mankind likes to think in terms of extreme opposites it is given to formulating its beliefs in terms of either or between which it recognizes no intermediate possibilities when forced to recognize that the extremes cannot be acted upon it is still inclined to hold that they are all right in theory but that when it comes to practical matters circumstances compel us to compromise educational philosophy is no exception experience and education

experiential learning is a powerful and proven approach to teaching and learning that is based on one incontrovertible reality people learn best through experience now in this extensively updated book david a kolb offers a systematic and up to date statement of the theory of experiential learning and its modern applications to education work and adult development experiential learning second edition builds on the intellectual origins of experiential learning as defined by figures such as john dewey kurt lewin jean piaget and l s vygotsky while also reflecting three full decades of research and practice since the classic

first edition kolb models the underlying structures of the learning process based on the latest insights in psychology philosophy and physiology building on his comprehensive structural model he offers an exceptionally useful typology of individual learning styles and corresponding structures of knowledge in different academic disciplines and careers kolb also applies experiential learning to higher education and lifelong learning especially with regard to adult education this edition reviews recent applications and uses of experiential learning updates kolb s framework to address the current organizational and educational landscape and features current examples of experiential learning both in the field and in the classroom it will be an indispensable resource for everyone who wants to promote more effective learning in higher education training organizational development lifelong learning environments and online

this is an enlarged revised edition of the paul carus lectures which john dewey delivered in 1925 it covers dewey s basic formulation of the problem of knowledge with both a full discussion of theories and resolutions propounded by other systems and a detailing of dewey s own concepts upon the relationship of the external world the minds and knowledge starting with a thorough examination of philosophical method dewey examines the interrelationship of experience and nature and upon the basis of empirical naturalism analyzes experience the formulation of law the role of language and social factors in knowledge the nature of mind and the final interrelation of mind and matter dewey as in his other mature philosophy attempts to replace the traditional separation of nature and experience with the idea of continuity using the traditional separation of nature and experience with the idea of continuity using the concept of language as the bridge dewey s treatment of central problems in philosophy and philosophy of science is profound yet extremely easy to follow his range of subject matter is very wide from the anthropology of malinowski to gravity evolution and the role of art and his insights are clear and valuable scientists philosophers of science philosophers and students of american history of thought will all find this one of the most profitable

works by a great 20th century thinker

everyday we are confronted with problems and challenges which we address by drawing on our experience and by using this experience to find ways of learning what to do in new circumstances learning through experience is the normal commonplace approach to learning and we take it for granted whilst much is known about teaching and being taught far less attention has been given to learning in context in particular to learning outside the classroom yet this is in fact where most learning takes place one especially neglected area is the role which people other than the learner play in facilitating learning this role is undertaken not only by teachers trainers parents and counsellors but also by managers supervisors care givers and friends this book brings together the experiences of a number of practitioners who write from often strongly contrasting perspectives these include feminism marxism critical pedagogy post modernism and gestalt humanistic clinical and transpersonal psychology the authors also come from a wide range of international backgrounds including adult higher and teacher education community work organisational development and psychotherapy each chapter is grounded not only in professional practice and in theory but also in personal experience overall then the book provides fascinating insights into what some good practitioners do to promote learning and how they make sense of this david boud is professor in the school of adult education university of technology sydney nod miller is professor in the department of innovation studies university of east london

our success in life and living depends largely on our ability to learn from experience direct contact with things and persons affects every facet of our lives behavior perception autonomy and creativity this overview of experiential learning explores the process of learning from experience showing how it affects one's personality and offers means to cope with feelings of powerlessness and insignificance the book describes the conditions under which experiential learning results in personal

growth and those in which growth is inhibited it shows how we test the validity of our interpretations and how we resist such tests learning to learn from experience examines the learning process in various types of social relationships it shows how learning in large groups differs from that in intimate circles finally it illustrates the interrelationships between experiential and academic learning this book also provides a wealth of practical strategies and tools enabling the reader to prepare for useful experiential learning

this handbook pulls together for the first time both the theory and the practice of experiential learning and all types of learning that employ activity based experience based on sound theoretical underpinning and making full use of examples and guidance for successful implementation experiential learning enables readers to unleash some of the more potent ingredients of learning through experience everything that can possibly provide or affect a learning experience is discussed most theories of learning and every conceivable way to interest learners in an activity even very accomplished developers who prepare learning experiences for all types of learners from grade level classes through executive seminars can undoubtedly find many ideas to expand the design options upon which they can draw leadership and organisational development journal previously known as the power of experiential learning

based on john dewey s lectures on esthetics delivered as the first william james lecturer at harvard in 1932 art as experience has grown to be considered internationally as the most distinguished work ever written by an american on the formal structure and characteristic effects of all the arts architecture sculpture painting music and literature

this monograph offers perspectives that challenge the increasingly taken for granted assumptions about the renewed interest in experiential principles and methods chapter 1 identifies the different dimensions of experiential education it describes contemporary examples to demonstrate the political economic and ideological differences in their use contemporary texts on experiential education are examined to explore how their perspectives contribute to and or reflect these divergences finally the chapter suggests how a critical perspective one that does not take for granted the usefulness of experiential approaches but seeks to identify the different and often conflicting purposes behind their use can inform the development of learning and training chapter 2 argues that experience is intense unique and profoundly social the individual may construct her his own learning yet the ingredients for such a construction come from elsewhere it sees one central source of experience as the economic system that places people in and out of work up and down the hierarchies of power and status the chapter also explores why some experiences seem more persuasive than others the monograph concludes by addressing the educational

issue of the present whether experiential perspectives are employed or not the assault on traditional notions of liberal adult education contains 77 references ylb
